Three-in-One Dispersion

Thursday, November 13

Dighton Livestock Auction Market

DIGHTON, KANSAS

126 Head

8 BULLS

30 BRED FEMALES

44 COWS WITH CALVES

INFORMATION

SALE TIME

The sale will start at 12:30 p.m., Thursday, November 13.

LOCATION

The sale will be held at the Dighton Livestock Market Sale Pavilion. Dighton is located 24 miles east of Scott City on U.S. Highway 96 or 100 miles west of Great Bend.

TERMS

The terms of this sale are cash unless other arrangements have been made in advance with the owners and the sale manager notified. Settlements are to be made with the clerk of the sale immediately at the conclusion of the auction. All stock will be at the buyer's risk as soon as bid off.

GUARANTEE

Since this is a dispersion, all cattle sell as they are. No guarantee is being made. However, we will not knowingly sell anything but dependable breeding cattle. All bulls will be semen tested and all females pregnancy examined to minimize any risk to our good customers.

LIABILITY

Each transaction in this sale will constitute a contract between the buyer and seller of each lot. The auctioneer, ringmen, or sale manager have been employed for specific tasks not connected with the handling of the cattle or the condition of the premises and they will accept no liability, legal or otherwise, for the buying contract or for any accident. Neither can the seller accept any liability for injuries that may occur. All persons attend this sale at their own risk.

Good Shorthorn cows like these two are like having money in the bank at 30 per cent interest.

REGISTRATION CERTIFICATE

A certificate of registry will be furnished with each registered lot and will be transferred to the buyer without cost to him. Application for registry, properly signed, will be furnished with each unborn calf sold in dam.

HEALTH

For over 20 years the Spitzers have vaccinated all heifers against Bang's. They are in a certified area. They also vaccinate for Blackleg and Malignant Edemia.

LUNCH

Will be available at the grounds.

LODGING

There are many good motels in the area. We suggest the Airliner, Scott City.

AUCTIONEER

Dick Kane, Wisner, Nebraska.

SALE MANAGER

Bill Stunkel, 1228 N. Nye Ave., Fremont, Nebraska.

FIELDMEN

Gene McDonald, The Shorthorn World.

Ken Holloway, American Shorthorn Ass'n, Omaha.

Dwayne Dietz, The Drovers Journal, Kansas City.

Mike Wilson, The Kansas Farmer.

Willis Houston, Kansas Stockman.

AND YOU CAN BUY THE HERD IMPROVING KIND IN THIS SALE

It is with much regret that we announce the complete dispersal of our registered Shorthorn herd. We have seen this coming for a number of years, but have been holding back like a kid being hustled off to the woodshed. Now we bow to the inevitable.

We have been engaged in the Shorthorn business since 1934. Very soon after that date we began putting together our registered herd. Needless to say, it has been a great source of pride and pleasure for us as well as being profitable.

We look back with especial satisfaction on the many pleasant contacts with the fine people engaged in the Shorthorn business in Kansas and surrounding states. . . . And we hope that we may be permitted to continue such pleasant associations in the future as commercial cattlemen.

About the herd . . . It has never been pampered, but we do try to keep everything in good breeding condition which is not always easy in the erratic seasons we sometimes have out here. That is the way the cattle will be offered on sale day . . . in their everyday clothes.

All bulls of serviceable age will be semen tested by sale day; and all females, pregnancy tested. The bred females have all been pasture-mated, checked daily; and, wherever possible, breeding dates will be given. These will be made available on Sale Day.

Everyone is most cordially invited to this sale.

I. J. SPITZER

Think "Cents-Ably"

Anyone who has attended a major show this summer knows full well that judges are picking them bigger, longer and trimmer. This is true in all breeds. This trend has confused a lot of breeders and buyers.

Every cattleman knows full well that often his best and most profitable cow is his hardest looker and maybe even the smallest. So size doesn't necessarily measure a cow's profit potential.

A test at Texas A & M University, McGregor, Texas, is underway on cow size. A. Melton, animal husbandman in charge of the test, says preliminary results show no positive relationship between size of the cow and the gain of the calf. He said milk yield of the dam seems to have much more effect on performance of the calf than size of the cow.

Surprisingly, and contrary to some other reports, smaller cows often gave as much, or more milk than large cows.

In the test, cows were divided into groups according to size. In one group, Melton found the smaller cows raised calves weaning an average of 29 pounds more than those from the larger cows . . . **and on ten pounds less feed.**

In another group, the small cows raised calves weaning 72 pounds more than the larger cows . . . **and on 237 pounds less feed.**

We don't cite these figures as a condemnation of large cows. On the contrary, we encourage the trend to larger cattle as long as they remain productive, efficient and profitable.

Size is not always the most "cents-able". There are many other factors influencing the profit picture. We feel that the purchase of good, average size cows of proven bloodlines ARE A SOUND INVESTMENT. We feel the retention of these cows in the breeding herd

IS SOUND. We also feel that breeders need to be buying bulls that will correct herd faults. If you need more thickness, buy a bull with this trait . . . if you need more milking qualities, buy a bull from a dam known for superior milk production.

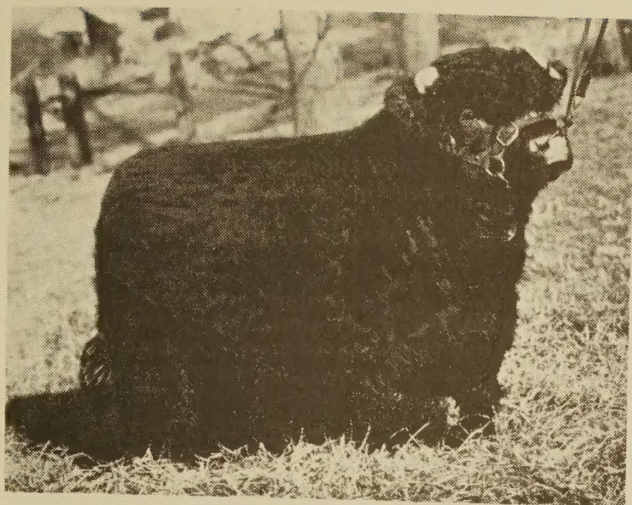

Not too long ago, "experts" stampeded the cattle industry to a type that made little sense. Just as the short-legged, fancy-headed, short-coupled cattle were once heralded as the right kind, just so the opposite now. The new type makes more sense but even it might not be the entire answer 10 years from now.

We know of one Nebraska Sandhills rancher with a quality whiteface herd that sold them to replace with a new, big breed. He woke up to discover that he could only maintain about two-thirds as many of these big cows on the same acreage. Where his herd had been culled for many years for calving percentage, he now came up with the lowest percentage calf drop in his career. Then to top it all off, when the calves were sold they didn't weigh nearly enough to compensate for the lower selling price per pound or the fewer calves available for sale. **THIS MAN HAS THE BIGGEST COWS IN HIS AREA AND IS GOING BROKE FOR THE PRIVILEGE.**

What is the answer? We advise every one to get on a performance testing program and prove to himself what are the most profitable sized cattle for his operation. Make sure the change you make is for the best. **BASE YOUR CHANGE ON SOUND STATISTICS NOT A LOT OF LOOSE THEORIES AND TALK.**

The Spitzers have paid a lot of attention to size and those of you looking for bigger cows in their working clothes will appreciate this offering. We think there are a lot of "cents-able" cows in this sale that will be a help to your herd improvement program.

—BILL STUNKEL, sale manager

KC GALLANT HERO—This four-year-old herd sire is leaving us some tremendous calves. And, well he should. He was the junior champion at the Missouri State Fair and grand champion at the Mid-America Fair. His sire is perhaps the greatest Shorthorn show bull of all time having been undefeated supreme champion of Great Britain in 1962 and is the only bull ever to win both the Perth and Royal Highland supreme championships in one year. He also topped seven other shows. Benefactor has sired five International champion females. Bapton Constructor marked a turning point in the Shorthorn breed to cattle of more length and ruggedness. At the time of his death, 87 sons had averaged \$4,722 and 52 daughters \$2,338. The list of champion progeny sired by Constructor and his sons mark a most impressive chapter in Shorthorn history.

CLAYMORE CLIPPER CHIEF—An extremely well-balanced, thick made bull. Eldak Red Ranger was the grand champion at the 1961 Minnesota State Fair, annually one of the largest shows in the nation. He was also reserve grand champion, Montana State Fair; reserve junior champion, American Royal; first-prize, Chicago International. Red Ranger was sold to Lewisfield in Virginia for \$10,000 for two-thirds interest.

Tom Hawkins, Hawkins Cattle Co., Ft. Klamath, Ore., testifies . . . "In 1950 we were using only whiteface bulls. We gradually changed to all Shorthorn bulls and by 1960 we had increased our weaning weights by nearly 100 lbs. per calf. Our average calf weighed 680. We always get more for our calves than do our neighbors with another breed."

In commenting on these five young bulls, we hesitate to say much, since so much emphasis is today placed on performance.

We have made a practice of steering and feeding out part of our male calf crop each year. Out of the 1968 calf crop, we marketed a draft of six at the Farmlands Industries plant at Garden City, August 12th. These six included four by the KC bull and two by the Hyperbole bull. They were marketed on a grade and yield basis and dressed out at 64.81%.

The remainder of this bunch are still on feed. We may have more to report on them by sale date.

BAR SIGMA AUGUSTA G V H—This young roan daughter of our Hoyt bull is out of a dam by the 1961 State Sale champion . . . Her maternal grand-dam, by the 1958 Mid-Kansas champion. She has a March 31st red male at foot. Re-mated to Claymore Clipper Chief.

What Is A Shorthorn Bull Worth?

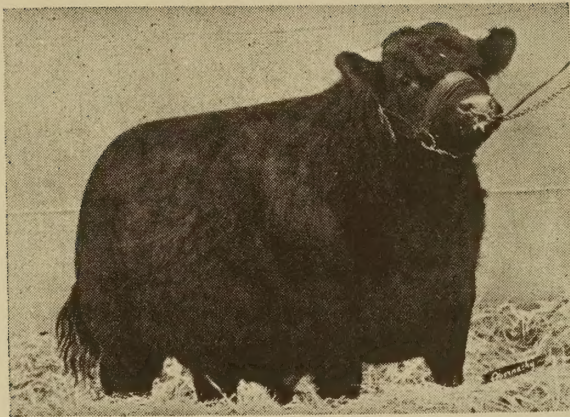

What is a good Shorthorn or Polled Shorthorn commercial bull worth? Those of you who have had experience with Shorthorns know their superior profit-making ability and have a figure in mind. For those of you who have not had experience with Shorthorns, we cite this story . . .

Ray Holder, Harrisonville, Mo., used a Shorthorn bull on 20 cows of another beef breed. He used a bull of the same breed as the cows on 20 others.

Nineteen crossbred calves resulted. These were developed the same way and on the same feed as his straightbred calves. At the end of eight months, when sold, the cross breds averaged 189 lbs. a head more than the straightbreds and sold for the same price. The heifers sold for \$20.00 per cwt. and the steers for \$23.00.

A little arithmetic shows that the Shorthorn bull added \$43.47 to the value of every steer calf and \$37.80 to each heifer calf. If ten of these were steers and nine heifers, the added return from using a Shorthorn bull was \$774.90 on just one calf crop of 19 head.

Good Shorthorn bulls will make you money. We have the profit-making kind in this sale.

ELCONA ROBIN STANDARD

A CHALLENGE

It has been predicted that by 1980 the U.S. population will be about 230,000,000 people consuming an average of 120 pounds of beef per person. This will require over 27 billion pounds of beef which is about 42 per cent more than was consumed in the U.S. in 1966.

Our historical dependence on western sources for feeder cattle is changing. New feedlot operations in range areas are now depleting some of the Corn Belt's dependable sources for calves. This means that farmers all over the country are going to have to produce more of the feeder cattle required. This March one Iowa auction market was sending two semi-loads of calves each week to Colorado for feeding . . . a sign of things to come.

Then, too, 70 per cent of the material used for producing beef . . . corn stalks, wheat pasture, beet tops, etc. . . have no higher "use-value" than beef production.

With land values increasing in range areas, the land investment to carry a cow-calf is now cheaper in many sections of the Southwest than it is in more westerly range areas.

This all means a great opportunity for the cow owner in Oklahoma, Kansas and Texas. The market for beef is growing. We need more farmers producing more calves on their marginal acres. Economists predict it will be a paying proposition.

You can buy "extra" profit cows in this sale.

C. A. Mallett Cattle Co., Miles City, Mont.,
writes: "Our cow herd contains 600 Angus and
crossbred cows. Our entire sire battery is now
Shorthorn bulls. We purchased Shorthorn bulls
to get a better calving percentage, a heavier
calf, and a better feeding animal. Shorthorn
crossbreds wean about 10 per cent heavier than
straightbreds of other breeds. I think the Short-
horn cross will eliminate a lot of the cancer eye
and womb troubles of the Hereford."

LOT 58—WONDER'S LADY GOLDIE 3228-747

Tattoo RE 6419

Red. Calved August 24, 1964. Bred by I. J. Spitzer, Scott City, Kansas; 2nd owner, February 10, 1965, Harry E. Sharpe, Scott City, Kansas.

SIRE: Willow Lee Major

 Red, I. J. Spitzer Lady Goldie 67th
 Roan, Wm. E. Thorne

WONDER'S LADY GOLDIE—The granddam of this cow was purchased in a Kansas State Sale from the late Wm. E. Thorne. She and her heifer calf at foot were bought in our 1959 sale by Bob Crockett, Kinsley, who had a top-selling bull from one of her offspring at Salina. This 5-year-old has produced three good calves. Re-mated to K C Gallant Hero.

A "GROWTH" STOCK

Shorthorn and Polled Shorthorn cows are a growth stock: In financing parlance this means a sound investment that is assured of increasing in value.

The future of all beef cattle looks bright. The growing population in America and a growing per capita beef consumption makes investment in cow-calf programs mighty attractive.

The Shorthorn-Polled Shorthorn future looks especially bright. That is because the breed has more to offer the beef world than any other breed.

There are breeds more highly glamourized... there are breeds with more inflated values but no breed is more universally recognized for its improvement ability than the Red, White and Roan. Nearly every large, exotic breed in the world owes much of its parentage to Shorthorns. If you really think about that fact alone, you should have a greater appreciation for Shorthorns.

No breed has more genetic purity than Shorthorns. The breed has no problem with dwarfism, cancer eye, prolapses, sunburned udders. No beef breed is so enriched with milking ability, with docility, with gaining ability.

There has been talk about Shorthorn lack of carcass quality. However, at the 1969 New York and Indiana State Fairs, Shorthorn carcasses were winners on the rail. In a Penn State University taste test, women scored Shorthorns the highest for tenderness, flavor and juiciness followed, in order, by Polled Herefords, Angus, crossbreds, Charolais and Holsteins.

We could go on and on about Shorthorn superiority and their higher profit potential. If you own Shorthorns, you know their dependable productive ability. If you don't own Shorthorns, it is high time you did. The females offered in this sale can do much to cement your faith in our breed.

SHORTHORNS WORTH MORE

Shorthorns are worth more on a carcass basis, according to statistics revealed at the 1969 Minnesota Beef Cattle Clinic, St. Paul. According to the University of Minnesota research the following results were shown:

Breed	Average Value Per day of Age	Total Carcass Value	Dollar Advantage
Shorthorn	\$.80	\$325.12	
Hereford	\$.703	\$297.24	-\$27.88
Angus	\$.673	\$286.17	-\$38.95
